### **NEW MOSSBERG® 935 MAGNUM™ TURKEY GUN EXTREME PERFORMANCE FOR THE hardcore HUNTER**

North Haven, CT (January, 2009) – The Mossberg 935 Magnum series has certainly taken more than its fair share of gobblers, continuing to prove itself as the pinnacle in performance for a 3 ½” autoloading shotgun. Mossberg expands this product line this year with the introduction of a pistol grip stock configuration on their 935 Magnum™ Turkey model.

The pistol grip, full-length stock offers a 13” length of pull, which provides ease of mobility when calling in “Boss Tom.” The dual gas-vent system releases excess gas to aid in recoil reduction and eliminate stress on operating components making for a rugged and reliable turkey gun.

Developed for use with 12 gauge 3” and 3-1/2” factory loaded shotshells, the 935 Magnum comes from the factory with a 22” overbored barrel. Unlike other brands, which offer “backbored” barrels, Mossberg’s overbore design spans the entire length of the barrel, providing a gas cushion for the shot charge. Not only does this reduce felt recoil, it reduces pellet deformation and internal friction. The result is exceptionally uniform, dense shot patterns that Mossberg models are known for. Couple this with Mossberg’s X-Factor™ Ported Tube, and you have the recipe for a tasty turkey dinner.

Drilled and tapped from the factory, the receiver is ready to accept bases for red dot scopes, or other optic systems. Another feature on this value packed autoloader is an easy-to-operate, quick-empty magazine button that unloads the shotshells from the magazine in a quick, convenient manner. The fully adjustable front and rear fiber optic sights make for rapid target acquisition in low light shooting conditions. The pistol grip 935 Magnum Turkey is available in Mossy Oak® Obsession®.

***Safety and safe firearms handling is everyone's responsibility.***

## Product Specifications
