NEW MOSSBERG® 930™ TURKEY GUNS AMBIDEXTROUS DESIGN FOR GREATER VERSATILITY

North Haven, CT (January, 2009) – For turkey hunters looking to step up to a high performance autoloader, Mossberg has expanded their offering and introduces two 930 Turkey guns with a new pistol grip stock, allowing greater handling and control when sighting in on Ol' Tom.

The new Mossberg 930 turkey models are the latest iteration of the 930™ family of autoloading shotguns. The pistol grip full-length stock offers a 13" length of pull, making it ideal for shooting from a blind, or leaning up against a tree when calling in a long beard. The 24" ported barrel and the dual gas vent system make this compact package easy to maneuver while minimizing recoil and muzzle lift. This design enables greater versatility and better balance for the hardcore turkey hunter.

The new pistol grip 930 is extremely versatile – developed for use with 12 gauge 2-3/4" and 3" factory loaded shotshells...from low-brass 1 oz target loads to non-toxic, heavy hitting magnum rounds. The receiver is drilled and tapped from the factory making it ideal for red dot scopes or other optic systems. The Uni-Line receiver has a soft, angled edge that marries the receiver with the stock perfectly, providing instinctive eye/sight alignment for instant target acquisition. Another feature on this value packed autoloader is an easy-to-operate, quick-empty magazine button that unloads the shotshells from the magazine in a quick, convenient manner. All Mossberg 930 Turkey models feature XX-Full extended choke for a tight, consistent pattern and the fully adjustable front and rear fiber optic sights allow for low light shooting conditions. The new 930 Turkey with pistol grip stock is available in two configurations: Mossy Oak® Obsession® and with matte blued barrel/black synthetic stock.

The 930 Autoloader ranks as one of the best values in American-made 3" Autoloaders on the market today – an eye catching, top-of-the-line shotgun that any hunter or shooter would be proud to own.

Safety and safe firearms handling is everyone's responsibility.

Product Specifications
