930™ AUTOLOADER

**RELIABLE AND AFFORDABLE, THIS IS THE
BEST VALUE IN 3" AUTOLOADERS ON THE MARKET TODAY.**

For hunters and shooters looking to step up to an autoloader, Mossberg provides the answer – the new 930 Autoloader. This gas-operated autoloading shotgun handles 2 3/4" and 3" shells with ease, making it a valuable all-around performer – from chasing pheasants to breaking clays to a day in the marsh. Stemming from the design of the formidable 935 Magnum™, the 930 is the best value in 3" autoloaders on the market today; a handsome, top-of-the-line shotgun that any shooter would be proud to own.

“The 930 is a perfect example of Mossberg’s commitment to bring sportsmen reliable, American-made firearms at an affordable price,” says Iver Mossberg, Chief Executive Officer of O.F. Mossberg & Sons, Inc. “You can’t beat the value of this beautifully designed, hard-working shotgun.”

That the 930 Autoloader features Mossberg’s classic dependability and no-nonsense performance comes as no surprise. However, the impressive fit and finish of this shotgun belies its price tag. On the All-Purpose field model, the sleek, natural feel of the 930’s cut-checkered, select walnut stock and forearm is seamlessly integrated into the distinctive, laser-engraved receiver and barrel. For turkey, slug and waterfowl hunters, a full range of the latest features and hi-definition camo patterns are available.

Its smooth, elegant contoured design, with Mossberg’s Uni-Line™ receiver, provides instinctive eye/rib alignment for instant target acquisition – a feature that hunters appreciate when the action is non-stop.

The 930 softens recoil and reduces muzzle jump with a self-regulating gas system that vents excess gasses. This system, one of the most simple and effective systems available on the market, also helps eliminate stress on critical operating components. It has few moving parts and no O-rings to spoil the action.

Safety and safe firearms handling is everyone’s responsibility.

Founded in 1919, O.F. Mossberg & Sons, Inc. is the oldest family-owned firearms manufacturer in America, and is the largest pump-action shotgun manufacturer in the world. Leading the way with over 100 design and utility patents to its credit, and standing as the first ISO 9001 certified long-gun manufacturer, Mossberg is considered to be one of the most innovative firearms manufacturers in U.S. history.

For complete details on the Mossberg® 930™ Autoloader, and the complete line of commercial, special-purpose, law enforcement and military shotguns, rifles and accessories, please call your local Mossberg dealer, or contact us at:
